

## Easy Scheme release 2.0

Metal Work's pneumatic schemes design software changes radically while maintaining the same interface and features that have made it one of our most popular applications.

The new Easy Scheme, in fact, is not turned in its basic drawing functions upside-down, but the data structure underlying the software, which allows the connection between symbols and product items, has been radically revised: if in fact with the previous versions this connection was based on a replica of the Metal Work article database, now the connection takes place directly through calls to the online configurators on our website - as shown in the example below:

Description
Mini-cylinders series ISO 6432
Cylinder series ISO 15552 standard
Cylinder series ISO 15552 STD low friction
Cylinder series ISO 15552 long cushioning
Cylinder series ISO 15552 Ø 160-200
Round cylinder series PNEC
Cylinder series ISO 15552 type A
Cylinder series ISO 15552 low friction type A
Stainless steel cylinders ISO 15552
Cylinder series ISO 15552 STD TWD-FLAT
Cylinder series ISO 15552 type A TWD-FLAT
Cylinder series ISO 15552 Ø 160-200 with intermediate hinge
<b>Cylinder series ISO 15552 series 3</b>
Cylinder series ISO 15552 series 3 TWD-FLAT
ISO 15552 Cylinder series HCR
Cylinder series ISO 15552 Ø 200-320
Cylinder series ISO 15552 Ø 250-320 with intermediate hinge
